Professional Summary

B.Tech Computer Science graduate, GATE 2026 qualified, with expertise in AI/ML, Full Stack Development, and Generative AI. Experienced in building intelligent applications using Computer Vision, Deep Learning, LLMs, Agentic AI, and Retrieval-Augmented Generation (RAG). Developed SRISHTI 2026 award-winning AI platforms and scalable web applications using Python and modern frameworks. Passionate about applying AI and software engineering to solve real-world problems and seeking opportunities as an AI/ML Engineer, Software Engineer, or Full Stack Developer.

Skills

Programming Languages: Python, Java, C, JavaScript, SQL, HTML, CSS
Machine Learning & Deep Learning: Supervised/Unsupervised Learning, Neural Networks, CNN, GANs, Feature Engineering, Model Optimization
Natural Language Processing (NLP): NLTK, LLMs, RAG, Text Processing, Chatbots
Computer Vision: OpenCV, Image Processing, Object Detection, Face Recognition
AI/ML Frameworks: Scikit-learn, TensorFlow, PyTorch, OpenCV
Web Development: Flask, Django, React, Node.js, REST APIs
Database & Cloud: MySQL, PostgreSQL, SQLite, Firebase
SAP: ABAP, SAP Technology Consultant (data integration and process automation)
DevOps & Tools: Git, Docker, Linux
Core Competencies: OOP, Data Science, System Design, Algorithms, Data Structures

Experience

Machine Learning Intern – CODSOFT (Remote) Jun 2025 – Jul 2025

- Processed 10,000+ data points from 5+ sources using Pandas/NumPy; evaluated 8+ models (Logistic Regression, SVM, Random Forest) with Scikit-learn, boosting accuracy by 15%.
- Built three classifiers (up to 87% accuracy) and performed EDA with Matplotlib and Jupyter.

Full Stack Developer Intern – UNIFIED MENTOR (Remote) May 2025 – Jul 2025

- Developed 5+ responsive pages with HTML5, CSS3, and JS, ensuring cross-browser compatibility.
- Designed Firebase/SQL schemas and implemented REST APIs for seamless frontend-backend integration.

Machine Learning Intern – PRODIGY INFOTECH (Remote) Apr 2025 – Jun 2025

- Built customer segmentation models using Scikit-learn and engineered 12+ features with Pandas, improving precision and recall.
- Optimized the ML pipeline through feature selection and hyperparameter tuning.

Data Science Intern – STEM ROBOTICS (Remote) Mar 2025 – Apr 2025

- Cleaned and transformed datasets with Pandas, creating 15+ engineered features to streamline preprocessing and improve model readiness.

Projects

SustainAI – Agentic AI Environmental Platform 2026

- Designed an agentic AI platform integrating LLMs, CV, and environmental data for automated waste analysis; built modular AI agents with REST-based communication.
- Reduced waste classification error by 30% via a custom CNN architecture for heterogeneous data.

Tech Stack: Python, Flask, React, LLMs, OpenCV, REST APIs

RetraceAI – Age-Invariant Face Recognition 2025

- Developed a GAN-based system for age-invariant face recognition with enhanced feature extraction.
- Applied a novel data augmentation strategy to boost cross-age matching accuracy by 12% under varying lighting.

Tech Stack: Python, TensorFlow, GANs, OpenCV

NeuroWave (CAIRS) – AI Climate-Aware Radio 2026

- Built an award-winning intelligent radio platform combining weather monitoring and AI-powered recommendations.
- Achieved 92% recommendation accuracy using ensemble learning on multi-modal sensor data.

Tech Stack: Python, TensorFlow, Climate Data, Signal Processing

TalkHub – Real-Time Chat Application

2025

- Built a full-stack messaging platform with WebSocket-based low-latency messaging and secure authentication.
- Optimised connection management to deliver sub-50ms latency for 100+ concurrent users.

Tech Stack: Node.js, WebSockets, Firebase, HTML, CSS, JavaScript

ePanchayat-360 – Digital Governance Portal

2025

- Developed a web-based governance portal with citizen service management and role-based dashboards.
- Automated task routing to cut query resolution time by 40%.

Tech Stack: Django, SQLite, Bootstrap

ChurnCast – Customer Churn Prediction

2025

- Built an ML pipeline using ensemble learning and feature engineering to predict customer churn.
- Improved recall by 20% via XGBoost with SMOTE and hyperparameter tuning.

Tech Stack: Python, Scikit-learn, XGBoost, Pandas

FraudShield – Fraud Detection System

2025

- Built a supervised ML model with SMOTE to handle imbalanced data for fraud detection.
- Achieved 95% precision through rigorous cross-validation and tuning.

Tech Stack: Python, Scikit-learn, SMOTE, Pandas

Medi AI – Intelligent Healthcare Assistant

2024

- Built an NLP-powered chatbot for symptom analysis with a web interface.
- Handled 95% of common symptom queries correctly, reducing false positives by 25% via hybrid rule-based/ML approach.

Tech Stack: Python, Flask, NLTK, NLP

Education

Bachelor of Technology in Computer Science and Engineering

2022 – 2026

Vimal Jyothi Engineering College, Kerala

CGPA: 8.3/10.0

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Machine Learning, Computer Networks, Operating Systems, Object-Oriented Programming, Discrete Mathematics

Higher Secondary Education (Science)

2020 – 2022

St. Thomas Higher Secondary School, Kerala State Board

Secondary School Leaving Certificate (SSLC)

2018 – 2020

St. Mary's English Medium High School, Kerala State Board

Awards

-
- Best Project Award (SRISHTI 2026) for NeuroWave (CAIRS)
 - GATE 2026 Qualified

Certifications

-
- SAP Technology Consultant Specialization
 - Learn SAP ABAP by Doing
 - Digital Transformation Using AI/ML with Google Cloud
 - Deep Learning (NPTEL, IIT Ropar)
 - Machine Learning (Infosys Springboard)

Leadership & Languages

Languages: Malayalam (Native), English (Advanced)

Leadership: Senior Patrol Leader (Bharat Scouts & Guides), NSS Volunteer, Techfest Website Development Team Member.
